Edge Computing Brain

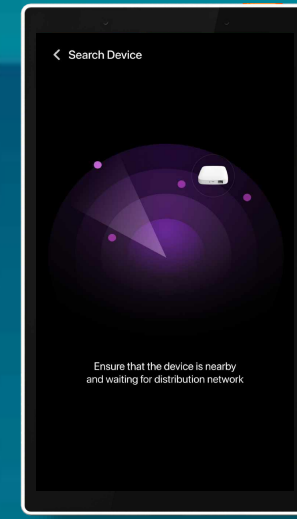

With Built-in **Multimode Gateway**, you can easily link **Zigbee** and **BLE Mesh** devices without a separate gateway.

Thanks to the hardware capability and **local network first** strategy, all devices can be controlled when the network is disconnected.

- ✓ **Device control without network**
- ✓ **Tap-to-Run without network**
- ✓ **Group control without network**
- ✓ **Automation logic executes at the edge**
- ✓ **Pairing devices without Mobile APP**
